This morning Jeff Champion, Tom Burgess, David Gibson, Al Leonard, and I met with Tom Fravel, a representative of the engineering firm that was retained by the Board in September 2013 for work on the Parking Deck. The firm has completed its initial site work and completed soil testing. Tom Fravel will attend the November 19 work session to discuss his findings with the Board. In addition, we will present to the Board a history of the Parking Deck project for SPLOST purposes. We explained to Tom today that any recommendation for how to proceed with the parking deck project needs to be accomplished within the framework outlined by the SPLOST ballot language. Specifically, if any repair work that is done can not be used for the new structure, then SPLOST funding can not be used to pay for that work. According to Al, the SPLOST funds have been collected to pay for the parking deck. This matter will be on the work session agenda for November 19.
