

**GORDON COUNTY, GEORGIA
MEMORANDUM**

To: Board of County Commissioners
From: Martin Vaughn
Subject: 911 Telephone System
Date: October 28, 2015

The Gordon County Board of Commissioners accepted sealed written Proposals from qualified vendors to procure a telephone system, components and software that meet or exceeds the functional requirements of Gordon County E9-1-1 as outlined in this request for proposal (RFP).

The Bid was posted on the county's web site and advertised in the Calhoun Times on September 30 and October 7, 2015. The bid was advertised on the State of Georgia procurement web site. The deadline to submit the sealed bids was 2:00 p.m. on October 26, 2015. County staff opened the bids received at that time in a public opening. Below is the response:

Bidder	Initial Price	5 Year Maintenance Cost
Synergem (Pilot Mountain, NC)	\$112,464.00	\$88,995.00
AT&T Solacom (Atlanta, GA)	\$151,581.11	\$95,250.00
GeoConex (Knoxville, TN)	\$154,121.22	\$92,730.00
Frontier Solacom	\$159,786.85	\$52,914.95
AT&T Intrado (Atlanta, GA)	\$188,491.00	\$111,600.00
Williams Communications (Rome, GA)	\$224,689.00	\$93,600.00

RECOMMENDATION

After reviewing all bids the recommendation is to award the bid to AT&T Solacom in the amount of \$151,581.11. This bid met all the specifications for the 911 center. The lowest bidder did not have any existing systems as bid installed in Georgia and the system is very new with what appears to be no fully implemented system nation wide. The staff does not recommend going with this system because of the critical nature of issues at the 911 center.

The amount will come from the current budget for the 911 center and the yearly maintenance is less than the current telephone system maintenance.

See attached bid:

AT&T Solacom

8.0 Cost Summary Sheet

Is there any software included with this proposal to be sold as a site license or will additional user licenses be required every time a user or user workstation is added to the system? Additional user licenses will be required
