Annette,

The Friends of Resaca Battlefield would like me to speak to the BOC about Gordon Co. allowing a section of the Ft. Wayne CW Historic Site to be used for the Resaca Sewer Project. Our group has donated a total of \$6,400 thousand dollars to Gordon Co. for the permanent purchase and site preservation. This amount includes the environmental study that was conducted on the area of proposed construction.

The FORB are not against sewer in Resaca, but are opposed to the route. We are wanting only to bring the BOC attention to several concerns. It was my understanding that this was on that agenda for consideration.

Thank you in advance,

Kenny
