# Service module descriptions

*All modules may not be included in the selected plan.*

## Website Quality Assurance

The Monsido Quality Assurance module finds issues on your website which may affect user experience, such as misspellings, broken links, readability issues and other inconsistencies. It also provides you with an overview of all files on your website and allows you to track scripts to make sure they are correctly installed.

## Document Scanning

The Document Scanning module checks your PDFs, Word, PowerPoint and RTF documents for broken links. With this module enabled Content Policies also check the aforementioned document types.

## Search Engine Optimization (SEO)

The SEO module automatically finds technical issues on web pages which may affect search engine rankings, such as missing or duplicate title tags, heading tags, or alt text on images. It can also find content-related issues, such as content which is too short. The SEO module not only alerts you to these errors and improvement possibilities, but also has in-tool suggestions on how to fix the issues.

## HTML Accessibility (WCAG 2.0/2.1 A, AA, AAA)

Make sure your website is in compliance with WCAG 2.0/2.1 A, AA, and AAA guidelines so everyone has a good experience while on your website. Monsido will scan your website and locate accessibility issues. With our in-app fix recommendations, accessibility issues are now easier to understand and fix to get your website up to standards.

## PDF Accessibility Tracking

Monsido PDF Accessibility Tracking Tool lists all scanned PDF files linked from the scanned website (both internal PDFs and PDFs linked to on external websites). This enables customers to review each PDF file in order to ensure compliance for the file in question. With the Monsido PDF Accessibility Tracking Tool, customers can ensure that every listed file is thoroughly tested and remediated without subjecting to the risks arising from incomplete compliance testing done by tools that are not able to test all aspects of PDF accessibility.

## PDF Accessibility Testing

The Monsido PDF Accessibility Testing Tool provided by Commonlook lists all scanned PDF files linked from the scanned website (both internal PDFs and PDFs linked to on external websites) and enables the customer to queue them for testing for WCAG 2.0 issues.

## Uptime

The Uptime feature checks your website's response every 5 minutes and shows the result in graph form. The feature allows you to set up real-time alerts for problems such as slow response or crashes.

## Readability Testing

Monsido will test the Readability level for scanned pages and make the results available in the reports. Adjusting readability levels for the target audience ensures that content is read and understood by the website's visitors.

## Analytics

The Monsido Analytics feature provides detailed information about the number of website visitors, visitor behavior, keywords, popular web pages, and more. Monsido Analytics is very easy to use and understand through the intuitive dashboard.

## Policies

The Monsido Policy feature allows you to set up policies for your site and search all crawled pages for violations and specific content, such as words, strings of words, email addresses, or employee names.

## PageAssist

The Monsido PageAssist feature allows you to add a personalization button to your website which allows your website visitors to tailor the web page they're on to their individual needs.

## Scans and Automated Reporting

Monsido will scan website pages which are publicly-accessible (up to the number of pages included in your plan and available using web-crawling methods) every 7 days. Your plan also includes a specific number of on-demand scans which can be performed as needed. After each scan, an automated report will be sent to you via email.
