

## **Pre-Proposal Meeting September 12, 2019 at 10 a.m.**

### **Environment details?**

325 Users at multiple locations – The 325 users do not include service accounts

3 main campuses and 6 satellite – satellite areas all have a data closet

Gsuite for everything

Dropbox

Would like to have a solution to monitor the workstation/user

SIEM: n/a

DLP: n/a

IAM: MFA

DNS: Microsoft DNS

Proxy: iBoss for Proxy

No preference between single platform vs point solutions

Management & Remediation - internal vs external

VM preference

AV/Malware on Endpoints, but something to monitor Endpoint to File Server activity

Looking for a contract up to 3 years (preferred) – cannot go longer than 3 years – layout a one year and three year option

No set go-live date, but would like an implementation guideline

Need a cybersecurity policy in place

Do not have an incident response plan and would like to develop one during this process
