Annette,

Jim asked me to forward this to you for next Tuesday's board meeting.

----- Forwarded message -----

From: **Pat Bedford** <pbedford@gordoncounty.org>

Date: Thu, Dec 3, 2020 at 11:33 AM

Subject: Security Equipment

To: James Ledbetter <jledbetter@gordoncounty.org>, Regan Bramblett <rbramblett@gordoncounty.org>

CC: Mitch Ralston <mralston@gordoncounty.org>, Robert Paris <rparis@gordoncounty.org>, Keith Henson

<khenson@gordoncounty.org>, Andy Roberts <aroberts@gordoncounty.org>

Jim, this is what we talked about needed to open security stations at the off site locations. I will just need a PO Number and I can have them here prior to the opening dates so we can get the training on them and have them ready. I am requesting 2 to be able to cover wherever the different locations turn out to be. I have attached the quote for 2, W9, and sole source statement.

thank you,

MAJ P.H. Bedford

Cellsense® Plus Sole Source Statement

Cellsense® Plus is the world's first portable, one-piece, full-body ferromagnetic detection system. Designed and manufactured by Metrasens, it is a state-of-the-art cell phone, weapon and contraband detector sold only by Metrasens and its authorized distributors.

Cellsense® Plus is the only detection system:

1. with the ability to operate in either a free-standing mode (with an accompanying base) or separated from its base and used horizontally, vertically or in angled positions.
2. that can be wall-mounted without the base.
3. that has no more than a 3" profile when mounted on a wall.
4. configurable to search mail, incoming goods, laundry bags, and other non-traditional items.
5. to include a dry-cell battery (sealed lead acid, not lithium ion) for use in extreme environmental conditions and for superior performance against memory loss.
6. requiring no calibration or auto-learn functionality. The system can be set up and turned on by one person and is operational in less than 10 seconds.
7. with a customized, hard-sided carrying case with wheels as standard.
8. with sensitivity controls to reduce nuisance alarms and provide for faster, more precise screening.
9. that can operate in covert mode (audio and visual disengaged) while continuing to provide full detection capability.
10. with full body, 6063-T6 grade aluminium construction for long term durability.

Additionally, Metrasens Inc. is the only manufacturer to offer an instructor-led, four-hour training course provided on-site by an authorized Metrasens trainer.
