Planning Staff Findings & Recommendations

The following standards from Section 10.03.0212.6 of the Gordon County Unified Land Development Code (ULDC), in addition to the Departmental Reviews above, have been considered in the findings and recommendations of the planning staff:

1. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property.

The subject property is compatible with the surrounding properties. There are small lots with mobile homes zoned agricultural.

2. Whether the proposed zoning will adversely affect the existing use or usability of adjacent or nearby property.

The proposed zoning will not adversely affect the existing use or usability of adjacent or nearby property.

3. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.

The subject property cannot be further developed as currently zoned because it is less than the minimum five (5) acre lot size requirement for A-1 zoning.

4. Whether the proposed zoning will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.

The proposed zoning will not generate additional vehicular traffic and/or impede on traffic flow.

5. Whether the zoning proposal is in conformity with the policy and intent of the Future Development Map and Comprehensive Plan.

The subject property is classified as Rural/Agricultural Reserve on the Gordon County Future Development Map. This classification supports land uses intended for large lot residential, agricultural, agribusiness, conservation, passive recreation.

6. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approved or disapproved of the zoning proposal.

The proposed zoning is in compliance with our Future Land Development Map and will have the potential to accommodate the needs of local residences for needed housing.

Planning Staff's Recommendation

The Rezoning Application #Z21-24 is recommended for approval subject to satisfying the requirements of the requirements of Environmental Health.

This report is a part of the official record of the subject application.

RURAL/AGRICULTURAL RESERVE

Description:

These are rural areas, away from Interstate 75 and the Calhoun Metropolitan Area. This part of the county consists of rural residential homes and family farms typically not served by sewer. The poultry industry has also seen tremendous growth in these parts of the county. Much of the County's floodplain lies within these areas providing for potential greenspace and recreational development.

Development

Strategies/Policies:

- ❖ Infrastructure: Limiting expansion of sewer to these areas will prevent over development if the county hopes to retain the rural character of this area. However, internet access in these areas is becoming increasingly important, particularly for students doing school assignments. Roads should only be widened when absolutely necessary. Zoning is another opportunity to prevent sprawl and over development.
- ❖ Conservation Easements: Many properties in these areas could take advantage of conservation easements. These are an opportunity to protect greenspace and natural resources. Conservation efforts are especially important along rivers and creeks.
- ❖ Agribusiness development: There is a growing market for locally produced products, whether fruits and vegetables, meats and cheeses, or even local wine production. North Georgia has seen explosive growth in the development of wineries and vineyards. Ensure that zoning and local ordinances allow for the development of such opportunities. These can also be tourism draws.
- ❖ Zoning: Protect the character of this area by zoning it for large lot residential and agricultural. Agribusiness properties should allow for enough of a buffer to prevent things like manure odors and insecticide overspray from adversely affecting the quality of life for neighboring residences.

Cows and calves, Highway 53.

Land Uses:

Large lot residential, agricultural, agribusiness, conservation, passive recreation (i.e. fishing, hunting)
